Ariyalur, Tamilnadu | github.com/itzmani05-cmd | +91 6369925623

PROFILE

Full Stack Developer with hands-on experience building and deploying production-ready applications, including a freelance EdTech platform used by **100+ students**. Skilled in designing scalable backend systems and responsive user interfaces.

PROFESSIONAL EXPERIENCE

Backend Intern *May 2026 - August 2026 | Coimbatore*

Bluekode Talent Venture

- Contributing to the backend development of the **Training Management Office (TMO)** platform, designed to support **500+ students, 10+ trainers, and academic leads** through a centralized training management system. Working on core modules for course management, enrollments, assessments, and student learning activities.
- Designing and refining relational database models for academic entities, assessments, enrollments, and progress tracking.
- Developing RESTful APIs for course management, enrollment workflows, assessment handling, and learner progress monitoring. Following clean architecture principles to create maintainable and extensible backend services.
- Implementing Role-Based Access Control (RBAC) and authentication. Enhancing security and access management across different user roles and system modules.
- Collaborating with senior developers and stakeholders to translate business requirements into production-ready backend features.

Tech Stack : *Nest JS, PrismaORM, TypeScript, PostgreSQL, AWS EC2, AWS S3, Redis* | **Github Link :**

Full Stack Developer Intern *Mar 2025 - Nov 2025 | Coimbatore*

TNEA - Tamil Nadu Engineering Admissions

- Developed a full-stack **seat-matrix management portal** used by 450+ engineering colleges across Tamil Nadu, streamlining student intake and government seat allocation through a centralized digital platform.
- Optimized scalable RESTful APIs and MongoDB database architecture to efficiently manage and process **200,000+ seat records**, improving retrieval speed and operational efficiency.
- Integrated secure document storage using AWS S3 and maintained applications on AWS EC2 with NGINX.
- Led technical troubleshooting and production support as the primary technical contact, debugging issues and resolving bottlenecks, to ensure uninterrupted operations and enhanced user experience.
- Built a full-stack college analytics platform for **450+ colleges**, featuring a responsive React.js interface with advanced search, filtering, and course-wise/cutoff-wise analytics to support data-driven academic decision-making.

Tech Stack : *React JS, Node JS, Express JS, MongoDB, AWS EC2, AWS S3, Antd, NGINX* | **Github Link**: *Frontend . Backend*

SKILLS

Client - React JS | TypeScript | React Native | HTML & CSS | Tailwind CSS | Ant Design |

Server - Node JS | Express JS | MongoDB | Nest JS | Nginx | Redis | Supabase | Prisma | PostgreSQL |

Programming Languages - Javascript | C | Java | Python |

DevOps & Tools - AWS EC2 | AWS S3 | Git & GitHub | GitHub Actions | Insomnia | Figma |

PROJECTS

C³ - Quiz Management & Student Activity Tracking Platform (Web + Mobile) | App . Website

- Developed and deployed an **EdTech quiz platform** with a mobile app and admin portal, enabling **100+ students** to participate in real-time quizzes while supporting **3+ administrators** in quiz management, automated evaluation, instant result generation, and performance tracking through a scalable and reliable system.

HRM - Human Resources Management System | *NestJs, PostgreSQL, React JS | (In Development)*

- Developing an employee management platform as a freelance project for Bigwigs Technologies, supporting **300+** employees and streamlining HR operations.
- Designing and implementing modules for employee management, attendance tracking, leave management, Payroll, Workspace, Biometric Integration, Invoice and HR administration.

EDUCATION

Sep 2023 - 2027 | Coimbatore

BE - Computer Science and Engineering

Government College of Technology,

*CGPA: **7.4**/ 10*
